Powder King® Purchases Rototron Mixers

ANTHEM, AZ, USA — Powder King®, a worldwide producer of pulverizing systems for the plastics industry, recently announced that they have purchased the Rototron High Intensity Mixer line from Rototron of Babylon, NY. Included in the purchase will be the name and complete assets of the Rototron mixers, which includes all inventory, drawings, customer lists, equipment lines owned by Rototron, such as Dry Flow testing equipment, and Drop Dart impact testing equipment.

“We value the great relationship with Joan Flaxman of Rototron,” says owner of Powder King®, Jim Hummel. “We had worked together over many years selling the mixers, so when given the opportunity to purchase Rototron, we quickly expressed our interest and finalized the sale with the company.” Benefitting both companies, we are excited to make this investment and begin adding the Rototron line to Powder King®,

already a worldwide presence in the Rotational Molding, PVC, Plastic Lumber, Fencing, and Plastics Industry.

Powder King® will begin to manufacture the High Intensity Mixers, Flow Funnels, and Drop Dart testing very soon in our state-of-the-art facility in Anthem, AZ. The High Intensity Mixers will be upgraded with a new design to improve the mixer operation and over all look of the mixer.

“We will be producing another high-quality product here at Powder King®, states owner Jim Hummel, for the Rotational Molding Industry. “Being that Powder King® has already manufactured a successful line of pulverizing systems for the past 17 years, we plan to continue to grow by adding new equipment to complement our pulverizing mills and our business.”
