

Let Our Customers Speak for us.

“

We just wanted to let your company know how pleased we are with the Powder King® Super Mega. Its performance and output has been unparalleled to any other machine we have tried. We really enjoy the simplistic design and function of the machine and the EC200 control makes it both efficient and user friendly. We are in the process of writing a new project to hopefully purchase more Powder King® pulverizing systems. ”

— Trent F.

“

We are extremely happy with all of our Powder King® systems: the Direct Drive, High Volume Mill Air Cooling and now the new EC200 Control System have clearly advanced Powder King® light years ahead of their competition. ”

— Mike G.

“

We love our Powder King® machine. It is well built and Powder King® stands behind their equipment. They do an excellent job helping us with service and troubleshooting if needed. We see a remarkable through-put, are very pleased with it and excited to operate the system. ”

— Darren B.
