

Jim Hummel, CEO of Powder King®, Promotes Justin Hummel to Manufacturing Manager

ANTHEM, AZ, USA — Powder King®, a worldwide producer of pulverizing systems for the plastics industry, recently announced the promotion of Justin Hummel to Manufacturing Manager. Justin will have the primary responsibility of quality control of all fabricated, machined parts, and components for the manufacturing of the entire line of Powder King® pulverizing systems. Justin's roll is critical to Powder King's production of producing world class pulverizing systems and meeting customer's delivery dates and expectations.

"Justin has been a key part of our success, and we are thrilled to promote him to this important position," said Jim Hummel, CEO of Powder King®. Justin, 26, joined the company in 2008, and as any ordinary employee, has learned every detail of manufacturing and assembling Powder King® Pulverizing Systems. Justin has gained experience in all areas of the business including: CNC disk sharpening services, fabrication and assembly, and maintaining a clean and safe environment.

As a young Manufacturing Manager and the founder's son, Justin faces additional pressure to advance himself in this role and to his co-workers. He has proven to be a leader." I don't ever want to be in my position because my Dad owns the company," Justin said. "I want to be in my position because I'm the right person for the job."

"I have watched my son Justin become a leader by starting from the very bottom and working his way up the ladder. One day, I would like to see him move into more corporate roles with Powder King®. This is a

wonderful beginning for Powder King®, as I know Justin treats the job and company as his own," Jim said.

Powder King® is a fast-growing company that is getting ready to expand their vision while remaining a family business and succeeding together. "Congratulations Justin Hummel on your hard work and earned promotion with Powder King®," Jim Hummel said.
